

Care Interventions Subcommittee of the Michigan Multipayer CPC+ Steering Committee

CHARTER

Revised: November 2018

“Patients with multimorbidity receive more fragmented care and have worse health outcomes, and health systems struggle to address their needs effectively. New ways to deliver care are required to manage these patients’ needs, especially in primary care, which often is responsible for their management.” Stokes, et al, The Foundations Framework for Developing and Reporting New Models of Care for Multimorbidity, doi: 10.1370/afm.2150Ann Fam MedNovember/December 2017 vol. 15 no. 6 570-577

Care Interventions Subcommittee Background: To realize the desired outcomes of the Multipayer Michigan CPC+ Initiative, the Steering Committee developed a Care Interventions Subcommittee to fulfill the following multipayer strategy pillar:

Strategy Pillar 4 DEVELOPMENT AND SPREAD OF CARE INTERVENTIONS TO IMPROVE OUTCOMES ON MEASURES THAT MATTER IN MATHEMATICA CPC+ EVALUATION

Leverage key performance improvement opportunities to catalog and categorize existing care interventions, compare their efficacy and effectiveness, and disseminate the most promising for scaling and spread; create new care interventions and update and refine those that have disseminated.

Care Interventions Subcommittee Charge: The charge of the Care Interventions Subcommittee is to leverage key performance improvement opportunities to catalog and categorize existing care interventions, compare their efficacy and effectiveness, and disseminate the most promising for scaling and spread; create new care interventions and update and refine those that have disseminated.

The subcommittee will issue recommendations to the Steering Committee and work with partner subcommittees to optimize what multipayer and multistakeholder collaboration can achieve.

Leadership & Operations Support: The Subcommittee will be led by an appointed Chair. Member nominations will be queried as outlined below. Facilitation and support resources will be provided by the multipayer forum, to the extent possible in available funding. This will include logistical and meeting coordination support, subject matter research support, etc.

Membership: Multistakeholder CPC+ Community involvement is an important value of our multipayer Michigan CPC+ initiative. Therefore, an open call for membership to practice, PO and participating plan representatives who are interested and have expertise and enthusiasm that would benefit the subcommittee’s success will be communicated via the CPC+ Michigan Multipayer communication vehicles. No more than eight members will be selected. Additional meeting participants may be invited to attend sessions as the subcommittee desires.

Workplan and Timeline

The timeline will be based on key dates and project requirements that include:

Milestones		
By 12/31/18	By 6/30/20	By 12/31/21
<ol style="list-style-type: none"> 1. Create a framework in which to categorize care interventions 2. Determine a method to assess each, including a review of the body of peer-reviewed literature. 	<ol style="list-style-type: none"> 1. Categorize and catalog care interventions and assess their efficacy and effectiveness 2. Recommend and support implementation of at least two care interventions 	<ol style="list-style-type: none"> 1. Demonstrate positive outcome performance (e.g., favorable quality and utilization performance, etc.) from implementation of recommended care interventions
